Coforge announces partnership with Databricks to help organizations generate actionable insights from data

Greater Noida, September 21, 2022: [Coforge Limited](#) (NSE: COFORGE), a global digital services and solutions provider announced a new alliance with [Databricks](#), the lakehouse company. As a Databricks consulting and implementation partner, Coforge will bring in a fusion of its innovations to build industry-specific solutions and services for enterprises across the globe leveraging Databricks' Lakehouse Platform. As part of this alliance, Coforge and Databricks will cater to the wider data modernization challenges faced by customers across industries and is aligned with Coforge's commitment to drive impact for clients by generating actionable insights, often in real-time, from data.

The future of enterprise is in multi-cloud and hybrid cloud environments. Large volumes of data will be generated at the edge. As more and more businesses will embrace digital infrastructure, it will give an immense surge in data generation. They need to deploy advanced cloud-based technologies, including analytics tools with machine learning (ML) capabilities to use data from multiple sources and systems to deliver the right experiences to the right customers, at the right time. Therefore, it is business critical to have a modern data foundation that can operate seamlessly across different environments.

Databricks offers an open data lakehouse platform based on 'one security and governance model' to accommodate all enterprise data types in a cloud-agnostic way to govern the data wherever it is stored. Databricks' Lakehouse Platform has already been adopted by over 7000 customers around the world.

Coforge in alliance with Databricks will support a cloud-based lakehouse platform that accelerates data-driven innovation for clients across several industries. The company has trained over 100 engineers as Databricks experts available for customers and their data management roadmap.

Commenting on the alliance, Deepak Khetpal, EVP, Global Head of Data & Analytics, Coforge said, "As organizations strive to generate real-time actionable insights from data, they need a strong modern data foundation to process the high volume and variety of data from many disparate sources. To address this opportunity, I am pleased to announce our new partnership with Databricks." He added, "Cloud, Data, Automation, and Digital are our growth pillars, and partnering with Databricks is a step towards modern data foundation revolution."

About Coforge

Coforge is a global digital services and solutions provider, that leverages emerging technologies and deep domain expertise to deliver real-world business impact for its clients.
