Coforge - Engage with the Emerging

Coforge is a global digital services and solutions provider that leverages emerging technologies and deep domain expertise to deliver real-world business impact to its clients. We focus on very select industries, a detailed understanding of the underlying processes of those industries, and partnerships with leading platforms provide us with a distinct perspective. Coforge leads with its product engineering approach and leverages Cloud, Data, Integration and Automation technologies to transform client businesses into intelligent, high-growth enterprises. Coforge's proprietary platforms power critical business processes across its core verticals.

We are somewhat atypical in our approach to solving business problems. We are specialists, not just engineers and technologists, who spend an inordinate amount of time understanding the targeted functional spaces that we focus on.

We transform enterprises with advanced AI capabilities

Quasar by Coforge is a comprehensive AI solution designed to ensure ethical, fair, and transparent Al applications. It addresses biases, enhances content safety through real-time harmful content detection, and offers robust tools for governance and compliance. Quasar is particularly impactful in the banking and finance sectors, where it personalizes customer experiences, combats fraud, and streamlines processes. Additionally, it accelerates content processing and excels in data extraction and analysis from diverse sources, making it a versatile tool for businesses aiming to leverage AI responsibly and effectively.
